MEMORANDUM

To: Members of C95.4 Peak-Power Working Group
From: Fred L. Cain, Chairman *FLC*
Subject: Article Review and Reliability Assessment

As I indicated I would do in my memorandum of 13 December 1976, I have culled out articles unrelated to peak power effects, and I am now in the process of mailing out the information to WG-1 members regarding the articles that must be obtained, reviewed, and assessed. Your portion of the total number of articles currently available from Ed Hunt for assessment is enclosed. Your cooperation in making your assessments as soon as possible will be greatly appreciated.

cc: A. W. Guy (without enclosures)
