**INTERNATIONAL EXHIBITION
and
INTERNATIONAL SCIENTIFIC SYMPOSIUM ON
«Protection of Man in Working Environment»**

**16 – 21 April 1978
Poznań, Poland**

The International Exhibition and the International Scientific Symposium SECURA 78 are organized by:

**the Ministry of Labour, Wages and Social Affairs
of the Polish People's Republic,**

**the Polish Chamber of Foreign Trade,
the Central Council of Trade Unions, and
the Federation of Engineering Association**

in cooperation with
**the International Labour Office and
the International Social Security Association,
Geneva**

The aims of SECURA 78 are as follows:

- intensification of international cooperation and trade exchange in modern protective and ergonomic solutions,
- wide-scale promotion of scientific, technical and organizational development in the field of protection of man in working environment.

**INTERNATIONAL EXHIBITION
«Protection of Man in Working Environment»
16 – 21 April 1978**

Subjects of the exhibition

Group I

Technical means of the occupational safety and health

- Modern solutions in the field of occupational safety in working premises,
- design of machinery and equipment, tools and other materials as regards ergonomic requirements,
- ventilation, air conditioning and dust collecting equipment and installations,
- electronic devices applicable to occupational safety and health techniques,
- technological solutions in production processes from the point of view of occupational safety and health,
- solutions aiming at reducing and eliminating noise and vibration,
- the best possible solutions in material handling operations, from the point of view of occupational safety,
- technological solutions for safeguarding of workers on big altitudes,
- occupational safety in underground mining,
- • protection against electric shocks and effects of electromagnetic fields.

- lighting of working premises and places,
- equipment for vocational rehabilitation and adaptation,
- equipment for production and supply of refreshing beverages for workers,
- inventions and improvements in the field of occupational safety and health,
- other equipment of man protection in his working environment.

Group II

Testing and control – and measuring instruments

- Instruments for testing of concentration of vapours, gases and dust in the air,
- instruments determining the level of noise and vibration,
- instruments for testing the effects of HF electromagnetic fields,
- instruments testing protective properties of personal protection equipment and protective clothing,
- instruments for tests in the field of hygiene and physiology.

Group III

Means of the personal protection

- Protective clothing for hot working places, oil, acid and lye resistant, waterproof, gastight, protecting against the effects of HF electromagnetic fields (protective footwear, gloves etc.),
- personal protection equipment: protectors of head, eyes, face and ears, safety belts, straps, fall preventing equipment, etc.,
- working clothes and their manifold uses in industrial and non-industrial establishments,
- hygienic means of protection of man in working environment: lotions, pastes, etc.

Group IV

Promotion means and educational aids in the field of labour protection

- Scientific and popular publications: books, magazines,
- posters of warning, instructing and propaganda types,
- training tables and kits,
- photos and slides,
- model cabinets of work protection (fixed and movable),
- other educational aids connected with occupational safety.

Particular attention will be paid to posters and publications and a display will be organized outside the fairgrounds of the Poznań Fair Management in the Poznań Palace of Culture.

Participation. Fees.

Applications for participation in the International Exhibition SECURA 78 should be sent till 30 October 1977.

The cost of 1 sq metre of the exhibition area is:

closed space, ground floor	– US \$ 26
closed space, balcony	– US \$ 23
open space	– US \$ 11

INTERNATIONAL SCIENTIFIC SYMPOSIUM

«Protection of Man in Working Environment»

17 – 20 April 1978

Subjects of the plenary sessions

The subject matter of the plenary session has been included in the following papers:

1. Efficiency of prevention of accidents at work and occupational diseases.

2. The influence of scientific and technological progress on formation of working conditions.
3. Formation of active attitudes of workers in creating optimum conditions for protection of man in working environment.
4. Fundamental problems of labour protection in the process of mechanization and automation of production.
5. The influence of standardization on progress in the protection of labour.

Subjects of the sections

Section I: Elimination of hazards resulting from chemical processes

Section II: Overcoming of hazards in factory transport and work on altitudes.

The above mentioned types of hazards will be dealt with on a broad basis, considering various technical, technological, organizational and educational factors, as well as aspects of applying the immediate means of personal protection.

Participation. Fees

Application for participation at the Symposium should be sent up to 30 September 1977.

The participation fee of US \$ 70 should be remitted to the account:
