Mr. Zorach R. Glaser
Biophysics Division
Naval Medical Research Institute
Bethesda, Maryland 20014

Dear Mr. Glaser:

I'm writing a book on electrical and radiation safety and I really do need your help.

Mr. Bill Oliphant of the Howard W. Sams & Co., publishers, has expressed an interest in this proposed book and has requested that I prepare two sample chapters.

One of these chapters is to be on radiation safety--around radars, electronic ovens, color TV's, etc.

Therefore, would you please share with us your safety procedures/instructions related to radiation hazards? Photographs and drawings to illustrate your procedures would of course be most welcome.

Could you possibly provide us a copy of NAVSHIP 0900-005-8000 and NAVSO P-2455? And if it wouldn't be asking too much, could you provide us photos of radar safety goggles and radar protective suits?

If the need arises, may we quote you?

To introduce myself, let me say that I am a free lance writer in electronics and that my articles have been published in POPULAR ELECTRONICS, RADIO ELECTRONICS, SCIENCE DIGEST, etc.

To meet the Sams Co.'s request, I will need your material by 16 December. I hope this early date will not be too great an imposition.

Gratefully yours,

Edward A. Lacy
